

TABLE OF CONTENTS

PATHOLOGY

A) GENERAL PATHOLOGY

- | | | | |
|------|------------------------|------|------------------------------|
| 1.1 | Cell injury | 1.12 | Metastases |
| 1.2 | Wound repair | 1.13 | Genetics - Pedigrees |
| 1.3 | Inflammation | 1.14 | Autosomal recessive diseases |
| 1.4 | Cytokines | 1.15 | Autosomal dominant diseases |
| 1.5 | Complement | 1.16 | X-linked recessive diseases |
| 1.6 | Autoantibodies | 1.17 | Turner syndrome |
| 1.7 | What is amyloid? | 1.18 | Klinefelter syndrome |
| 1.8 | Hypersensitivity | 1.19 | Deletions |
| 1.9 | Oncogenes | 1.20 | HLA |
| 1.10 | Tumor suppressor genes | 1.21 | Most common causes |
| 1.11 | Tumor markers | | |

B) ORGAN PATHOLOGY

- | | | | |
|------|--------------------------|------|----------------------------|
| 1.22 | SLE | 1.47 | Obstructive lung diseases |
| 1.23 | Systemic sclerosis | 1.48 | Restrictive lung diseases |
| 1.24 | Sjögren's syndrome | 1.49 | Pneumonia |
| 1.25 | Immunodeficiencies | 1.50 | Lung tumors |
| 1.26 | Bleeding disorders | 1.51 | Glomerulonephritis 1 |
| 1.27 | Hemolytic anemias | 1.52 | Glomerulonephritis 2 |
| 1.28 | Other anemias | 1.53 | Urolithiasis |
| 1.29 | Red blood cells | 1.54 | Venereal diseases |
| 1.30 | Neutropenia | 1.55 | Testicular tumors |
| 1.31 | Leukocytosis | 1.56 | Ovarian tumors |
| 1.32 | Leukemias | 1.57 | Endometrium |
| 1.33 | Lymphomas | 1.58 | Placenta |
| 1.34 | Plasma cell neoplasias | 1.59 | Breast |
| 1.35 | Phlebothrombosis | 1.60 | Mouth |
| 1.36 | Arteriosclerosis | 1.61 | Diverticulas and hernias |
| 1.37 | Arteritis | 1.62 | Gastritis |
| 1.38 | Aneurysms | 1.63 | Gastroenteritis |
| 1.39 | Heart sounds | 1.64 | Polyposis of colon |
| 1.40 | Congenital heart defects | 1.65 | Inflammatory bowel disease |
| 1.41 | Ischemic heart disease | 1.66 | Malabsorption |
| 1.42 | Myocardial infarction | 1.67 | Cholelithiasis |
| 1.43 | Heart failure | 1.68 | Carcinomas |
| 1.44 | Endocarditis | 1.69 | Jaundice |
| 1.45 | Pericarditis | 1.70 | Hepatitis |
| 1.46 | Rheumatic fever | 1.71 | Hepatitis B serology |

- | | |
|------------------------------|-------------------------------------|
| 1.72. Toxic hepatitis | 1.83. Pituitary hyperfunction |
| 1.73. Cirrhosis | 1.84. Pituitary hypofunction |
| 1.74. Liver carcinoma | 1.85. Adrenal adenomas / carcinomas |
| 1.75. Arthritis | 1.86. Thyroid |
| 1.76. Bones | 1.87. Thyroid tumors |
| 1.77. Cartilage | 1.88. Parathyroids |
| 1.78. Bone tumors | 1.89. Diabetes mellitus |
| 1.79. Muscular dystrophies | 1.90. Multiple endocrine neoplasia |
| 1.80. Brain tumors | 1.91. Skin tumors |
| 1.81. CNS degeneration | 1.92. Other skin diseases |
| 1.82. Demyelinating diseases | 1.93. Toxins |

MICROBIOLOGY

A) GENERAL MICROBIOLOGY

- | | |
|---------------------|-----------------------------------|
| 2.1. Gram stain | 2.5. Toxins |
| 2.2. Special stains | 2.6. O ₂ -Requirements |
| 2.3. Normal flora | 2.7. Most common causes |
| 2.4. Cell walls | |

B) BACTERIA

- | | |
|-------------------------------|--|
| 2.8. Staphylococci | 2.16. Gram-negative bacilli (zoonotic) |
| 2.9. Streptococci | 2.17. Other gram-negative bacilli |
| 2.10. Neisseria | 2.18. Mycobacteria |
| 2.11. Bacilli | 2.19. Higher bacteria |
| 2.12. Gram-positive bacilli | 2.20. Spirochetes |
| 2.13. Clostridia | 2.21. Chlamydia |
| 2.14. Enterobacteriaceae | 2.22. Rickettsia |
| 2.15. More Enterobacteriaceae | |

C) VIRUSES

- | | |
|----------------------|----------------------------------|
| 2.23. DNA viruses | 2.27. Slow viral diseases of CNS |
| 2.24. Herpes viruses | 2.28. Prions |
| 2.25. RNA viruses | 2.29. Retroviruses |
| 2.26. ARBO viruses | 2.30. HIV |

D) FUNGI & PARASITES

- 2.31. Fungi
- 2.32. Fungal diseases
- 2.33. Malaria
- 2.34. Tissue protozoa
- 2.35. Intestinal protozoa
- 2.36. Trichomonas
- 2.37. Flukes
- 2.38. Tapeworms
- 2.39. Roundworms

PHARMACOLOGY

- 3.1 Drug interactions
- 3.2 Bad combinations
- 3.3 Famous side effects
- 3.4 Antidotes
- 3.5 Antibiotics
- 3.6 Drugs of choice
- 3.7 Penicillins
- 3.8 Cephalosporins
- 3.9 Antiviral drugs
- 3.10 Antifungal drugs
- 3.11 Antiprotozoal drugs
- 3.12 AIDS
- 3.13 Inhibitors of translation
- 3.14 Inhibitors of replication
- 3.15 Inhibitors of transcription
- 3.16 Combination chemotherapy
- 3.17 NSAIDs
- 3.18 Gout
- 3.19 Heart failure
- 3.20 Antihypertensive drugs
- 3.21 Anti-angiotensins
- 3.22 Ergot alkaloids
- 3.23 Diuretics
- 3.24 Antianginal drugs
- 3.25 Platelet aggregation inhibitors
- 3.26 Anticoagulants
- 3.27 Thrombolytics
- 3.28 Antiarrhythmic drugs
- 3.29 Inotropic drugs
- 3.30 Asthma
- 3.31 Insulins
- 3.32 Sulfonylureas
- 3.33 Hyperlipidemias
- 3.34 Hyperlipidemia drugs
- 3.35 Peptic ulcers
- 3.36 Adrenergic drugs
- 3.37 Cholinesterase inhibitors
- 3.38 Cholinergic drugs
- 3.39 Antimuscarinic drugs
- 3.40 Antinicotinic drugs
- 3.41 Oral contraceptives
- 3.42 Street drugs
- 3.43 Opioids
- 3.44 Antidepressants
- 3.45 Lithium
- 3.46 CNS stimulants
- 3.47 Anxiolytic drugs
- 3.48 Hypnotic drugs
- 3.49 Antihistamines
- 3.50 Anesthetics
- 3.51 Parkinson's disease
- 3.52 Neuroleptics
- 3.53 Antiepileptic drugs
- 3.54 Antiemetic drugs
- 3.55 Laxatives

BIOCHEMISTRY

- 4.1. Reactions & location
- 4.2. Enzyme kinetics
- 4.3. Amino acids
- 4.4. Amino acid precursors
- 4.5. Amino acid disorders
- 4.6. Enzyme defects
- 4.7. Monosaccharides
- 4.8. Hexose kinases
- 4.9. Saccharides
- 4.10. Saccharide disorders
- 4.11. Enzyme defects
- 4.12. Glycogen storage diseases
- 4.13. Enzyme defects
- 4.14. Glycosaminoglycans
- 4.15. Fatty acids
- 4.16. Bile acids
- 4.17. Lipoproteins
- 4.18. Phospholipids
- 4.19. Glycolipids
- 4.20. Sphingolipidoses
- 4.21. Enzyme defects
- 4.22. Porphyrins
- 4.23. Enzyme defects
- 4.24. Preferred nutrients
- 4.25. Vitamins
- 4.26. ATP equivalents
- 4.27. Key enzymes - sugars
- 4.28. Key enzymes – fats
- 4.29. Key enzymes - others
- 4.30. Steroids
- 4.31. Adrenal gland
- 4.32. Testis (Leydig cells)
- 4.33. Peripheral metabolism
- 4.34. Ovary (Theca cells)
- 4.35. Ovary (Granulosa cells)
- 4.36. Peripheral metabolism
- 4.37. Corpus luteum
- 4.38. 17- α -hydroxylase deficiency
- 4.39. 21- α -hydroxylase deficiency
- 4.40. 11- β -hydroxylase
- 4.41. Endocrine control of metabolism
- 4.42. Nucleotides
- 4.43. Purines
- 4.44. Pyrimidines
- 4.45. Gene expression
- 4.46. Transcription
- 4.47. Replication

ANATOMY

A) EMBRYOLOGY

- 5.1. Germ layers
- 5.2. Fetal remnants
- 5.3. Derivatives of branchial arches
- 5.4. Pharyngeal pouches
- 5.5. Urogenital development
- 5.6. Fetal circulation

B) GROSS ANATOMY

- 5.7. The skull and its holes
- 5.8. Eye
- 5.9. Tongue
- 5.10. Mandible
- 5.11. Larynx
- 5.12. Shoulder
- 5.13. Brachial plexus
- 5.14. Brachial plexus Injuries
- 5.15. Brachial nerve injuries
- 5.16. Elbow
- 5.17. Wrist cuts
- 5.18. Hip
- 5.19. Leg
- 5.20. Foot & ankle
- 5.21. Mediastinum
- 5.22. Coronary arteries
- 5.23. Abdominal arteries
- 5.24. Peritoneum
- 5.25. Layers of spermatic cord
- 5.26. Ovary / testis

C) NEUROANATOMY

- 5.27. Cortex
- 5.28. Cerebral arteries
- 5.29. Transient ischemic attacks
- 5.30. Hypertensive hemorrhage
- 5.31. Cranial nerves
- 5.32. Visual system
- 5.33. Parasympathetic ganglia
- 5.34. Basal ganglia
- 5.35. Thalamus
- 5.36. Brainstem syndromes
- 5.37. Medulla
- 5.38. Lower pons
- 5.39. Upper pons
- 5.40. Crossing over sites
- 5.41. Where is the lesion?
- 5.42. Key dermatomes

PHYSIOLOGY

- 6.1. Six equations you really need
- 6.2. Ion channels
- 6.3. Transport
- 6.4. Signal transduction
- 6.5. Nerve fibers
- 6.6. Touch receptors
- 6.7. Accommodation
- 6.8. Nystagmus
- 6.9. Cochlea
- 6.10. Deafness
- 6.11. Autonomic nervous system
- 6.12. Cholinergic receptors
- 6.13. Adrenergic receptors
- 6.14. Control of heart beat
- 6.15. Skeletal muscle
- 6.16. Control of muscle tone
- 6.17. Muscle types
- 6.18. Electromechanical coupling
- 6.19. Cardiac cycle
- 6.20. Lung volumes
- 6.21. Breathing patterns
- 6.22. Respiratory Center
- 6.23. Respiratory quotient
- 6.24. Acid base
- 6.25. Hemoglobins
- 6.26. Oxygen binding curve
- 6.27. Blood proteins
- 6.28. Circulation
- 6.29. Fetal circulation
- 6.30. Renal transport
- 6.31. Clearance
- 6.32. Volume regulation
- 6.33. Fluid shifts
- 6.34. Renin / Angiotensin
- 6.35. Juxtaglomerular apparatus
- 6.36. Intestinal absorption
- 6.37. Gastrointestinal hormones
- 6.38. Stomach
- 6.39. Pituitary feedback loops
- 6.40. Adrenal hormones
- 6.41. Insulin
- 6.42. Gonadotrope hormones

SOCIAL SCIENCES

A) PSYCHOLOGY

- | | |
|--------------------------------|-------------------------|
| 7.1. Motor development | 7.5. Defense mechanisms |
| 7.2. Psychological development | 7.6. Sleep stages |
| 7.3. IQ tests | 7.7. Suicide |
| 7.4. Conditioning | 7.8. Stages of dying |

B) PSYCHOPATHOLOGY

- | | |
|-----------------------------|------------------------|
| 7.9. Neurotransmitters | 7.15. Schizophrenia |
| 7.10. Grief & Depression | 7.16. Major depression |
| 7.11. Delirium & Dementia | 7.17. Epilepsy |
| 7.12. Personality disorders | 7.18. Drug abuse |
| 7.13. Anxiety disorders | 7.19. Child abuse |
| 7.14. Somatoform disorders | |

C) STATISTICS

- | | |
|---------------------------------|---------------------------------|
| 7.20. Definitions | 7.26. Randomized clinical trial |
| 7.21. Sensitivity | 7.27. Observational cohort |
| 7.22. Specificity | 7.28. Case control study |
| 7.23. Positive predictive value | 7.29. Cross sectional survey |
| 7.24. Negative predictive value | 7.30. Legal issues |
| 7.25. Cancer statistics (USA) | |
